our mission

Conservation with purpose

Hugging the banks of the Orange River, the Sandfontein Nature Reserve covers a vast swathe of ecologically important land and remains almost completely untouched. Thus, conservation and environmental stewardship hold deep significance for us in protecting this wild land.

Sandfontein has over many years expanded the boundaries of the reserve, re-introduced additional species, and locally sourced materials were used to build the eco-conscious Lodge, Suites and Villa. Organic fruit and vegetables are supplied from our own gardens on the Orange River and, to preserve its magical silence, the reserve operates entirely on solar energy.
